

Requirements for daycare: DHLPP, Rabies, Bordetella Vaccines

As of March 1 2017 we require all dogs to have a negative stool sample every six months to be eligible to attend our daycare.

You will need to make an appointment with our Daycare Staff on the first visit. During this visit you will need to provide proof of Rabies, DHLPP, Fecal Results, and Bordetella. You can have your veterinarian fax them to us at 978-632-7354. Our daycare questionnaire will be completed during your visit. It is also available online if you would like to fill out the questionnaire ahead of time. Appointments will be available 7-3 Monday-Friday

We like to introduce a new dog to day care slowly, the staff will do this as soon as they are able.

We will call you in the middle of the day to report daycare progress.

All dogs are required to be spayed & neutered by 6 months of age.

Please be aware daycare is suppose to be a fun, interactive experience, however there are no guarantees in life. All dogs react differently in an unknown situation, we can not predict every dogs behavior in every situation. Due to the unpredictable nature of any canine put into a group situation, injuries can and will occur. Even a vigorous play session can turn into a disagreement resulting in minor injuries. We do everything possible to maintain staff and canine safety. There may be an instance where your dog receives minor injuries, we will inform you of any injuries we are aware of. Please also be aware in the instance of an altercation requiring medical attention, you are responsible for any medical costs incurred. Our hospital staff will attend to your pet and call you with any reason for treatment.
